WM0450	453	61	189	1 1/4" M.NPT	43.1

Membran Hydrofor der ikke rustet

WellMate membran Beholderen er produceret med en inderkerne af Polyethylene (PE) der er godkendt til drikkevand, uden om kernen er der vævet glasfiber som forstærkningslag. Den indvendige gummisæk er af en kraftig kvalitet og godkendt til drikkevand. Der er ingen tvivl om, at WellMate Membran/ Hydroforer, er alle andre overlegne hvis man sammenligner kvalitet og pris, da man kan forvente en 5 til 10 gange længere holdbarhed. Mange billige membran beholdere i stål, rustet efter 1 til 2 år dette medfører at luftfortrykket falder eller helt forsvinder. En membran beholder uden luftfortryk er intet værd.

Der ydes 5 års garanti for tæring fra installationsdatoen.

Kan bestilles på tlf. 70202626 eller. Mail info@filtec.dk
